

## **Without Technology Name**

### **Concise & Conceptual (1–5)**

1. A Decentralized Framework for Privacy-Preserving Sleep Anomaly Detection and Behavioral Analysis in Healthcare
  2. Secure and Explainable Distributed Sleep Analytics: A Framework for Anomaly and Behavioral Pattern Recognition
  3. Decentralized Trustworthy Sleep Healthcare: Privacy-Preserving Anomaly Detection and Behavioral Analysis
  4. Privacy-Preserving Distributed Sleep Pattern and Behavioral Analysis for Safe Healthcare Applications
  5. Decentralized Framework for Secure Sleep Behavioral Analytics with Anomaly Detection
- 

### **Outcome-Focused (6–10)**

6. Achieving Privacy, Transparency, and Trust in Distributed Sleep Analysis: A Decentralized Healthcare Framework
  7. Decentralized Privacy-Preserving Framework for Sleep Anomaly Detection and Behavioral Pattern Recognition
  8. Trustworthy and Explainable Distributed Sleep Analysis: A Decentralized Healthcare Framework
  9. Secure Distributed Sleep Behavioral Analysis with High Efficiency and Privacy Guarantees
  10. A Decentralized Approach to Safe and Private Sleep Anomaly Detection and Behavioral Analysis
- 

### **Comprehensive & Formal (11–15)**

11. Decentralized Framework for Privacy-Preserving Sleep Anomaly Detection and Behavioral Analysis in Distributed Healthcare Environments
12. Secure, Transparent, and Trustworthy Distributed Sleep Analytics: A Decentralized Framework for Anomaly and Behavioral Detection

13. Privacy-Preserving Distributed Sleep Pattern and Behavioral Analysis with Anomaly Detection for Healthcare Applications
  14. A Decentralized Healthcare Framework for Safe Sleep Analysis: Integrating Anomaly Detection, Behavioral Pattern Recognition, and Privacy Preservation
  15. Decentralized Trust-Enabled Framework for Sleep Anomaly Detection and Behavioral Analysis in Privacy-Sensitive Healthcare Settings
- 

## **Contribution-Highlighting & Hybrid (16–20)**

16. Decentralized Privacy-Preserving Framework for Sleep Anomaly Detection and Behavioral Analysis: Validation on Multiple Public Benchmark Datasets
17. A High-Performance Decentralized Framework for Secure Sleep Behavioral Analytics with Anomaly Detection and Explainability
18. Decentralized Sleep Healthcare: Privacy-Preserving Anomaly Detection, Behavioral Pattern Analysis, and Transparent Verification
19. Safe and Private Distributed Sleep Analysis: A Decentralized Framework Integrating Anomaly Detection, Behavioral Analysis, and Trust Mechanisms
20. Decentralized Framework for Privacy-Preserving Sleep Anomaly and Behavioral Analysis in Distributed Healthcare Environments with Multi-Dataset Validation

### **With Technology Name**

1. Decentralized Privacy-Preserving Sleep Behavioral Analysis Using Deep Learning, Federated Learning, XAI, Blockchain, and Zero-Knowledge Proofs
  2. FL-XAI-Blockchain: A Decentralized Framework for Secure Sleep Anomaly Detection and Behavioral Analysis
  3. Trustworthy Sleep Healthcare Analytics: Integrating Federated Learning, Explainable AI, and Zero-Knowledge Blockchain Verification
  4. Decentralized Sleep Pattern and Behavioral Analysis with Deep Learning, Federated Learning, and Blockchain ZKPs
  5. Privacy-Preserving Distributed Sleep Analysis: A Framework Combining DL, FL, XAI, Blockchain, and IPFS
- 

### **Technical & Feature-Rich**

6. Autoencoder-Based Sleep Anomaly Detection and Behavioral Analysis in a Decentralized Framework Using FL, XAI, Blockchain ZKPs, and IPFS
  7. Evaluating Four Deep Learning Models and Eight Federated Learning Algorithms for Sleep Behavioral Analysis with Blockchain-ZKP Privacy Guarantees
  8. Decentralized Sleep Data Analytics: Deep Learning, Federated Learning, SHAP XAI, Blockchain Zero-Knowledge Proofs, and IPFS for Behavioral Pattern Recognition
  9. Secure and Explainable Federated Learning for Sleep Anomaly and Behavioral Analysis Validated on Sleep-EDF, MMASH, and PAMAP2 Datasets
  10. A Decentralized Framework for Sleep Healthcare: Integrating Autoencoder Anomaly Detection, FL, XAI, Blockchain ZKPs, and IPFS for Behavioral Analysis
- 

### **Comprehensive & Formal (11–15)**

11. Decentralized Privacy-Preserving Sleep Behavioral Analysis Combining Deep Learning, Federated Learning, Explainable AI, Blockchain Zero-Knowledge Proofs, and IPFS Storage
  12. Trust, Transparency, and Privacy in Sleep Healthcare: A Decentralized Framework Using DL, FL, XAI, Blockchain ZKPs, and IPFS for Anomaly and Behavioral Detection
  13. Integrating Autoencoder Anomaly Detection, Four DL Models, Eight FL Algorithms, XAI, Blockchain ZKPs, and IPFS for Secure Sleep Pattern and Behavioral Analysis
  14. Decentralized Sleep Behavioral Analytics: A Framework Validated on Sleep-EDF, MMASH, and PAMAP2 with Deep Learning, Federated Learning, XAI, Blockchain ZKPs, and IPFS
  15. Privacy-Preserving Distributed Sleep Anomaly and Behavioral Analysis Using Deep Learning, Federated Learning, Explainable AI, Blockchain Zero-Knowledge Proofs, and IPFS
- 

### **Contribution-Highlighting & Hybrid (16–20)**

16. A Decentralized Framework for Safe and Privacy-Preserving Sleep Behavioral Analysis: Integrating DL, FL, XAI, Blockchain ZKPs, and IPFS with Autoencoder Anomaly Detection
17. Decentralized Sleep Pattern Recognition and Behavioral Analysis: Deep Learning, Federated Learning, Explainable AI, Blockchain Zero-Knowledge Proofs, and IPFS
18. Secure Distributed Sleep Healthcare: Autoencoder Anomaly Detection, Four DL Models, Eight FL Algorithms, XAI, Blockchain ZKPs, and IPFS for Behavioral Analysis

19. Trust-Enabled Decentralized Sleep Behavioral Analysis Framework Using Deep Learning, Federated Learning, Explainable AI, Blockchain Zero-Knowledge Proofs, and IPFS Storage
20. Decentralized Privacy-Preserving Framework for Sleep Anomaly Detection and Behavioral Analysis: Integrating Deep Learning, Federated Learning, XAI, Blockchain ZKPs, and IPFS with Multi-Dataset Validation (Sleep-EDF, MMASH, PAMAP2)
